BOOK APPOINTMENT - Cynthia Lipinski

Description

In the booking appointment feature patients will have the ability to book their appointments online and be able to select an available appointment through a calendar. Any appointments that are taken will be grayed out and won't be selectable. The patient will have to log in to use this feature and will only have the options to view and create appointments with the specific physicians they are set up with. The patient's appointment information would also be sent to their email upon completing the form if they decide to include it.

The admin side will have the ability to view, create, edit, and delete all appointments. All the appointments can be viewed and filtered through a list. This makes it easier for staff to delete or update upcoming appoints if the patient calls ahead of time to cancel.

Schema

appid	Int	Not null	pk
appfname	Varchar	Not null	
applname	Varchar	Not null	
appemail	Varchar	null	
appphone	Int	Not null	
appdate	date	Not null	
apptime	int	Not null

STAFF DIRECTORY- Cynthia Lipinski

Description

The staff directory feature will show a list of all essential staff names, departments, and the phone extensions that they can be reached at. This keeps everything organized so that patients can easily communicate with their doctors.

The admin side will have the ability to view, edit, add, and delete staff members and their information. This will be useful for the staff to be able to keep the list up to date to avoid any confusion between patients and their contacts.

Schema

staffid	Int	Not null	pk
stafffname	Varchar	Not null	
stafflname	Varchar	Not null	
staffemail	Varchar	Not null	
staffext	Varchar	Not null	
specialtyid	Int	Not null	fk

CONTACT US - Cynthia Lipinski

Description

In the contact us section, there will be a map API showing the location of the hospital and the full address beneath it. Next to it there is a form that a user can fill out to be able to submit their feedback on the hospital along with their information so that they can be responded to with further direction by an admin if needed. This allows users to reach out to the hospital and increase community reach.

The admin will be able to view all feedback forums, have the ability to reply, and delete them. The admin will also have access to edit the map coordinates and hospital address information.

Schema

Contactid	Int	Not null	pk
Contactfname	Varchar	Not null	
Contactlname	Varchar	Not null	
Contactemail	Varchar	Null	
Contactphone	Int	Null	
Contactmessage	Varchar	Not null
