			1 of 1 <input type="button" value="<<"/> <input type="button" value="<"/> <input type="button" value=">"/> <input type="button" value=">>"/>

On the List Page of Admin, It will only show important Columns of a certain feature including the Action that can be made on each list. That maximum allowed columns on the List Page is six including the Action.

UPDATE PAGE/ CREATE PAGE

Title	<input type="text"/>
Author	<div>John Roll ▼ Not In the List? Add here</div>
Date	<input type="text" value="mm/dd/yyyy"/>
Content	<div><div></div><div></div></div>
Featured	<div>NO ▼</div>
<div>+ Add New Article</div>	

This page is always similar to the Create page, the only difference is the button to be clicked. In the create button, it will read as “Create or Add” and on the Update Page it will read as “Update”.

The create page and update page are usually similar to one another. In this wireframe, the Author list for this create or update form will be a dropdown list. This is because it the table Article is dependent on the Authors table. That’s why if you cannot see the Author on the list, you should be able to add the author first before adding it to the article, by clicking a link directing to the Author Create page.

<<

A list page only has 6 columns to show including the Action column. A list with more than 5 column, the column to be use will be the most important for the Admin to see right away. Such example would be volunteer List page. This page has a table with lots of columns, that's why only five important columns should be shown and the View Action will be used to show all the columns in the table. In this page, the name of the volunteer and the specific time and day including the preference are most likely the important information to determined which volunteer to choose from.

Notes

+ Add New Volunteer

Create and Update Page will be the same. This shows the Days would be the list of days in the week and user can actually add multiple values on it. Also the preference and Time are usually a checkbox where user can have multiple values, but as I look on some hospital website, the maximum number of hours they allow a volunteer to work for them is around 4-5 hours. That's why I decided to create my Time as a drop down instead of a checkbox. Also, it will be easily sort the time for admin to determine the exact time that the volunteer wants to work. Also, preference is one of the most important aspect for the volunteer, you don't like to volunteer on something you don't actually like or believe, that's why I put preference for each people who wants to partake the volunteer opportunity. Also, I preferred using it as a dropdown list, as the list are general preference for volunteering such as outbound patient, inbound patient, child care, Fundraising volunteer, Patient and Family Advisors, and Volunteer Resources. This preference are almost identical to any other hospital, but I decided to create a dropdown list because this will be easily sort it out by admin to determine the person who exactly want to volunteer on that specific task. Usually, the admin look for the preference and the Time for the volunteer list in order to give them a call about the volunteer opportunity.

Apply Today

Recruitment and onboarding of new volunteers is temporarily on hold until further notice. Feel free to complete and send an application. We will keep it on file.

Our active Volunteer Team of more than 520 contribute over 65,000 hours per year. On any given day, there are 60 or more volunteers carrying out various assignments throughout the hospital.

Our volunteers are:

- An integral part of our health care team by enhancing services to our patients, visitors, staff and physicians
- Ambassadors for Sault Area Hospital
- Demonstrators of Sault Area Hospital's iCoare values

We recognize the needs of volunteers as having meaningful opportunities for personal growth, having a positive and supportive environment, being acknowledged and appreciated and knowing that they support quality patient care at Sault Area Hospital.

The Volunteer Role

A 'volunteer' at Sault Area Hospital is defined as an individual who willingly donates their time and energy to the hospital to provide services or support patients, visitors or staff in an approved program of Volunteer Resources. A volunteer does not receive compensation from SAH.
