

ENTITY RELIOSHIP DIAGRAM FOR HOSPITAL CAREER SERVICES

Career services has two tables. Since hospital can have many jobs, I have decided to put jobs in one table and there can be many applicants for Many jobs so I have created another table Applications. So, One Job can have many applications so I have created a foreign key field JobID in Applications table so that I can keep track of different applicants that have applied for the particular job.

ENTITY RELIOSHIP DIAGRAM FOR HOSPITAL FAQ

Hospital FAQ Can be categorized into many categories so I have decided to use one category table. Also, One Category can have many Questions and many questions can be of same category. Since it best matches one to many relationship I have used FAQCategoryID as foreign key in the FAQs table. By this way I can organize questions under different categories and also it will be very helpful for the users to filter the questions according to their interest.

Category of job : Cardiology

Job Type : Full-Time

Posted on 10-04-2020

Description : Your goal in this position is to assist nursing personnel in providing personal care to residents and preform such procedures and treatments for which you have received special instructions. You will also preform other duties associated with the activities of daily living of the residents. This position supports the Hospital's academic mandate by advancing care through teaching and learning and/or transforming care through research and innovation. This position contributes to the shared responsibility of ensuring health and safety policies are followed to provide for a healthy environment for staff, physicians, volunteers , learners, patients and families.

Requirements:

- Completed Personal Support Worker (PSW) certificate from a College of Applied Arts and Technology
- Long term care experience, preferred
- Skilled in Point of Care (POC) preferred
- Bilingualism in French/English an asset
